

The below directions are to turn on the Google Chrome browser translation feature on a Windows computer.

For the most up-to-date information, directions on utilizing an android or Apple device, or troubleshooting, please visit the [Google Chrome Help Center](#).

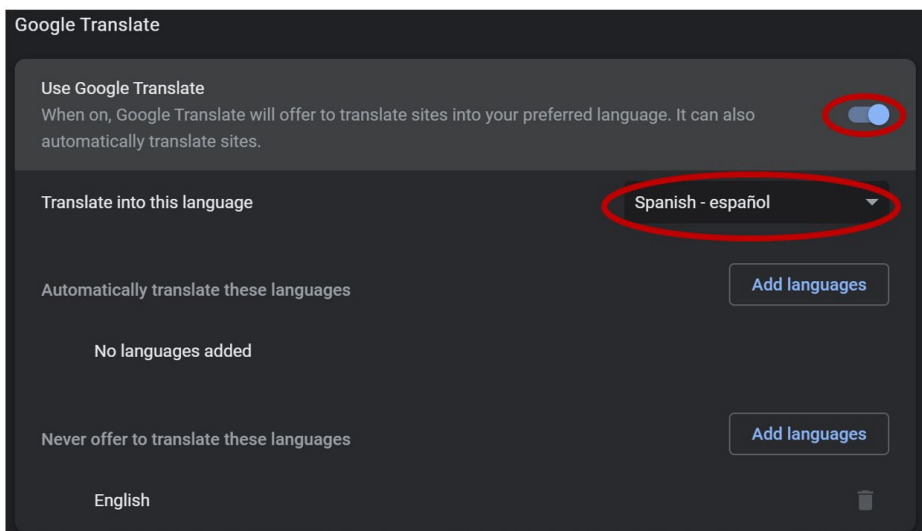

1. On your computer, open Chrome.
2. At the top right, click More  > **Settings**.

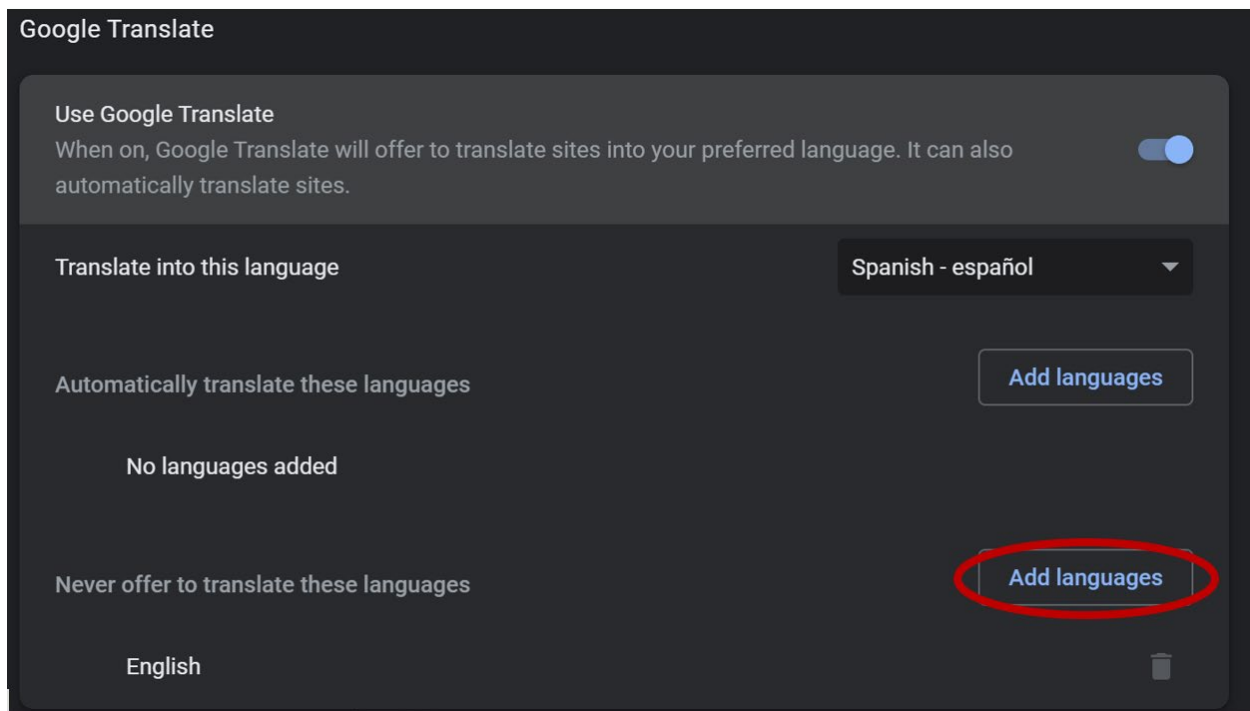

3. On the right, click **Languages**.

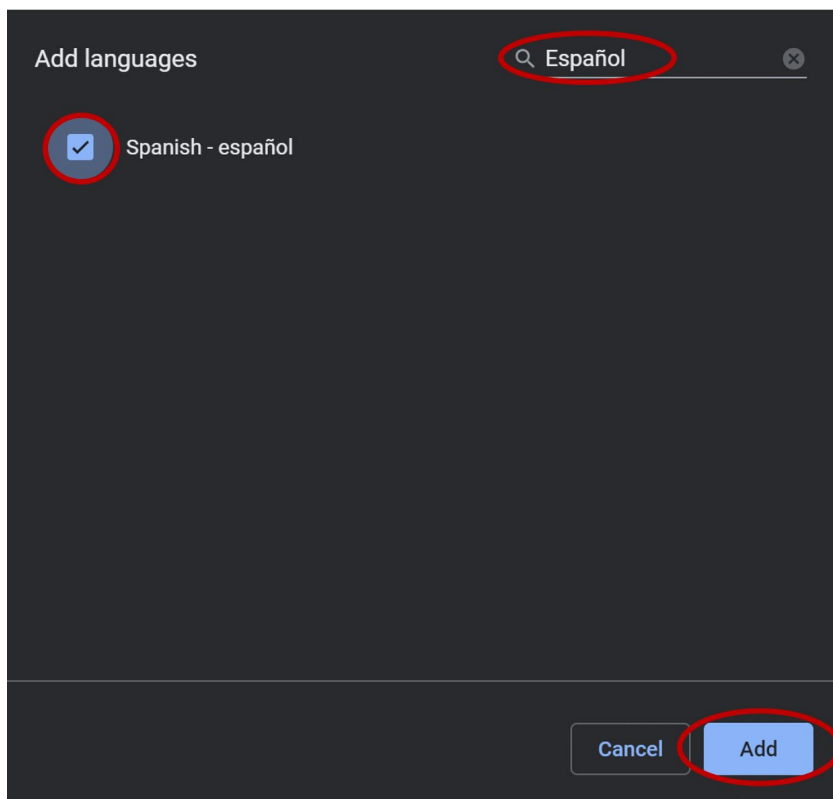

4. Under “Google Translate,” turn **Use Google Translate** on.
5. Select the language* that you want from the language list under “Translate into this language”. *Translation is available in multiple languages

- Under “Never offer to translate these languages,” click **Add languages**.

- Select the language that you want from the language list; or alternately search for the language. Then select **Add**.

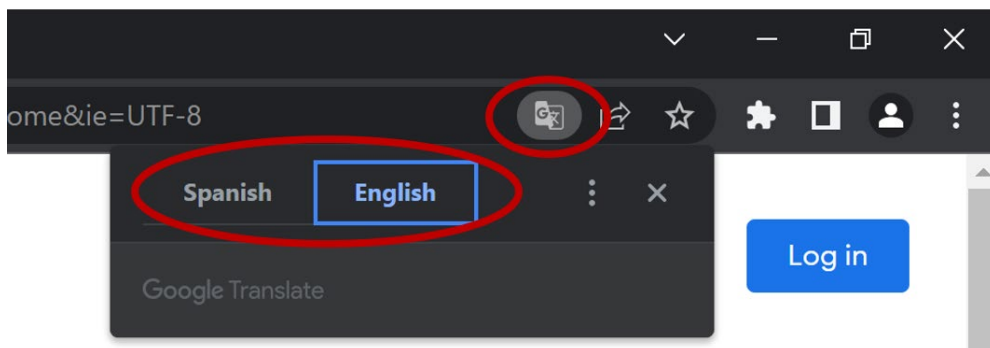

8. Delete “English”.

9. Restart Chrome to apply the changes; or, alternatively, refresh all open tabs.

10. Visit the webpage you wish to translate. On the right side of the search bar, click the **Translate this page** icon. This will open a pop up that allows you to toggle between languages.

11. At the top right, click More \vdots to open further options.
